

SPECIFICATION

Ducoplus 60 Specification

All windows to be fitted with Ducoplus 60, 60 mm glass reduction overglaze aluminium window 'flap' ventilator or similar approved.

To fit glass thickness of 20, 24, 28, 32 mm.

Provide quantities as shown in schedule.

Each ventilator to provide a minimum of 15,000 mm²/metre of background ventilation.

Ventilators to incorporate a soft line design outer profile and infinitely variable control by an adjustable twin wall PVCu flap incorporating a soft lip in co-extrusion.

Provide internal integral 'air deflector' to direct incoming air upwards.

Provide an insect screen by a punched aluminium inside grille.

Ventilator to be thermally broken and thermally performing when closed.

Control of flap to be hand operated, cord operated or rod operated.

Colour to RAL (any RAL colour available, also twin colour : e.g. black outer/white inner).

Fix in accordance with the instructions of the manufacturer.

Ventilator must fully meet the requirements of the Building Regulations.
